Paper Title :	PlusPug: A Methodology for the Improvement of Local-Area Networks
Reviewer:	
Reviewer Email:	

Please write down the contribution of this paper:
This paper presents an analysis of Byzantine fault tolerance

**If accepted, please write down the significance of the paper;
If rejected, please write down the reasons.**
Accepted. Topic of this paper is related to this conference. This paper mainly studies on a methodology for the improvement of local-area networks. The author introduces a scalable tool for evaluating Internet QoS(PlusPug), which the author uses to prove that digital-to-analog converters and XML are regularly incompatible. The author's work is suggestive, and the point of view deserves researching. Figures in this paper seem exact, which makes this paper more convictive. There is no major modification opinion, only please pay more attention to English grammatical rule and format your paper according to the template provided by conference homepage. We look forward to seeing you in EBISS2009.

Please choose the appropriate rating for each criterion:

<u>Evaluation</u>	Poor	Fair	Good	Very Good	Outstanding
Originality	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Significance and Usefulness	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
